This Year's Best Bargains

Astigmatic?

Is the cornea arched? If abnormally shaped in one direction you have astigmatism. In other words: When the light passes into the eye it is separated into two sets of rays, one focused on the retina, the other not focused, creating a blur or circle of difference on the retina. Involuntary straining of the eyes and headache are among the symptoms of astigmatism. Dr. Samuel, with the aid of retinoscope, ophthalmoscope, refractometer and test case, scientifically diagnoses your case. There's no question of a doubt.

Garments as Illustrated Here and Many Others

89c

Every woman of refinement will appreciate "this year's best bargains." When the regular patrons of the Palais Royal's Lingerie Department learn that the annual clearing sale, that comes prior to the May Sale, begins tomorrow morning, the response will be as heretofore, prompt and enthusiastic. A word to those who are not "regular patrons"—many of the garments are somewhat tossed and tumbled, almost disreputable at first glance. Do more than glance—hypercritically examine the materials, the trimmings, and the needlework. Any garment pictured on this page can be yours tomorrow at 89c—and many others equally attractive.

See tables on first floor, northeast corner and third floor, northwest side. Come with your purse, prepared to secure supplies for the distant future. Note—No garment sent on approbation or C. O. D. It's to be a closing sale—quick and decisive.

Do these illustrations tell you the true story—that these waists are of aristocratic lineage and in no way relate to the plebeian and vulgar? They should.

Tomorrow's early visitors will have no trouble in finding all sizes, both in the plain tailored and lingerie styles. Put money in your purse—this year's best bargains are here.
